PROFESSIONAL SUMMARY

I am an Investment Banking professional with 5+ years of experience in financial advisory, valuation, and transaction execution, supported by advanced doctoral-level education in finance and mathematics. Known for applying rigorous analytical thinking to assess complex financial models and uncover inconsistencies that impact decision-making.

Expanded expertise into AI evaluation, focusing on reviewing machine-generated financial analyses, stress-testing valuation logic, and ensuring outputs align with real-world investment banking standards. Thrives in remote, asynchronous environments requiring structured reasoning, autonomy, and high-quality written feedback.

EDUCATION

PhD in Finance

Stanford University

Completed: 2019

- Specialization in corporate finance, valuation theory, and capital market dynamics
- Research focused on improving decision-making frameworks in complex financial environments

PhD in Mathematics

Princeton University

Completed: 2016

- Focus on applied mathematics, optimization techniques, and statistical inference
- Developed advanced quantitative reasoning applicable to financial modeling and AI systems

Bachelor of Science in Economics

Columbia University

Completed: 2013

PROFESSIONAL EXPERIENCE

Investment Banking Associate

Lazard — New York, NY

2021 – Present

- Led valuation and financial modeling efforts for mid-to-large scale M&A transactions across multiple sectors
- Reviewed transaction scenarios to assess financial feasibility and strategic alignment
- Identified modeling inconsistencies and improved analytical accuracy in client deliverables
- Applied structured frameworks to evaluate AI-generated financial outputs for realism and coherence
- Developed detailed investment memoranda and supported senior deal teams through execution

Investment Banking Analyst

Houlihan Lokey — Los Angeles, CA

2019 – 2021

- Built and maintained complex financial models including DCF, LBO, and restructuring scenarios
- Conducted company and industry research to support valuation and advisory engagements
- Analyzed financial statements and projections to identify risks and opportunities

- Assisted in preparing pitch books and client presentations for live transactions
- Strengthened internal model validation processes through detailed analytical reviews

CORE COMPETENCIES

- Advanced Financial Modeling (DCF, LBO, Accretion/Dilution)
- Corporate Valuation & Deal Structuring
- AI-Generated Financial Output Evaluation
- Quantitative Analysis & Mathematical Modeling
- Mergers & Acquisitions Advisory
- Financial Statement Analysis & Forecasting
- Logical Consistency Review & Error Detection
- Python for Finance & Data Analysis
- Remote Collaboration & Independent Execution

AI & ANALYTICAL EXPERIENCE

- Evaluated AI-generated valuation models and financial reasoning for accuracy and logical consistency
- Identified flawed assumptions and unrealistic projections in machine-generated outputs
- Provided structured feedback to enhance AI performance in financial analysis tasks
- Applied real-world investment banking judgment to validate AI-driven transaction scenarios

SELECTED ACHIEVEMENTS

- Enhanced model accuracy by detecting critical valuation errors in high-stakes transactions
- Recognized for delivering precise, high-quality analytical reviews under tight deadlines
- Successfully bridged traditional investment banking expertise with AI evaluation workflows

TECHNICAL SKILLS

- **Tools:** Advanced Excel, PowerPoint, Python
- **Platforms:** Bloomberg Terminal, FactSet
- **Capabilities:** Financial Forecasting, Data Analysis, Quantitative Modeling
